GLOBAL EXPRESSION OF INTEREST (EOI) FOR PROCUREMENT OF FLUSHING OIL/ LIGHT CRUDE OIL FOR MANGLA DEVELOPMENT PIPELINE OPERATIONS

Cairn India Limited now merged with Vedanta Limited is the operator of block RJ-ON-90/1 in India. The Block contains a number of major oil discoveries including the Mangala field. A pipeline is laid to transport crude oil from the Block at Barmer, Rajasthan to coastal terminal facility in Gujarat and to sell crude oil to coastal customers through Single Point Mooring (SPM) system installed in Arabian Sea near Bhogat, Gujarat in India.

The SPM facility at Bhogat is located approximately 60 km north of Porbander in Tehsil Kalyanpur, District Dwarka Gujarat and comes under the jurisdiction of Okha port Officer, Gujarat maritime Board. The onshore and offshore area adjacent to the SPM facility has been declared as Bhogat port under Indian port act 1908 by Government of Gujarat.

The crude oil flowing through the pipeline is waxy crude with wax appearance temperature (WAT) of ~ 65 deg C. As such crude oil temperature is maintained above 65 deg C by continuously heating the Pipeline with SEHMS (Skin Effect Heat Management System) technology. The crude pipeline from onshore terminal at Bhogat to SPM and subsea/ floating hoses needs to be flushed with suitable flushing oil after every export operation, in order to prevent congealing of crude in the system.

Operator on behalf of its joint venture partner’s invites Expression of Interest under International Competitive Bidding (“ICB”) process from reputed Suppliers (Indian and International) for supply of approx. 100,000 BBLS of light crude oil (LCO) for Bhogat.
